REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 18 THE REDCLIFF REVIEW, THURSDAY, DEC. 18th., 1930 Number 18

Former Redcliff Man Died in Vancouver

Gordon Patterson Passed Away Suddenly Monday.

Word was received in town last Monday announcing the very sudden death of Gordon Patterson, at his home in Vancouver. The late Mr. Patterson was one of the pioneers of Redcliff having come here shortly after the town started. For a number of years he conducted the bakery at present owned by H. Champ, to whom Mr. Patterson sold out about ten years ago. Since that time he has been in business in Vancouver.

The Review was unable to find out the cause of Mr. Patterson's sudden death as no word of his illness was received here it is presumed he either met with an accident or took a sudden stroke.

During his residence here deceased was one of the town's leading citizens. He served on both the School Board and Town Council and on one occasion was an unsuccessful candidate for the Mayor. Deceased was about 50 years of age. Besides his widow he leaves one son, Fred, who spent most of his school days here in Redcliff.

Mrs. Hicks, who is a sister of Mrs. Patterson's, left on Tuesday morning's train for Vancouver.

Local Armory Being Completely Renovated

When Completed It Will Make Splendid Quarters.

Messrs. F. Broughton and J. Devitt who have the contract for repairing the Armories here, have been busy at the work during the past week and already have made a big improvement in the appearance of the building.

The woodwork outside and in has been freshly painted and the brick work is also being re-ovated.

A new roof is also being put on the building.

The upstairs is being renovated throughout. When completed officers and men of the local Militia have an up to date Armory with comfortable club room quarters upstairs. Marshal and Scott have the contract for the plumbing.

Miss Singular, of the public School Staff who has been too ill to teach resumed her duties this week.

* * *

T. Mr. and Mrs. B. Brownlee, of Calgary, formerly of Redcliff, on Dec. 1st., a daughter.

* * *

Commencing the beginning of the New Year the C. P. R. will run an all rail service over the Crows Nest from Medicine Hat to Vancouver.

* * *

The Ladies Auxiliary to the local Legion will hold their annual Christmas tree in Cliff Hall on Friday evening, Dec. 19th. A social evening for members and their wives will be held after the Xmas tree program.

* * *

Last night a number of friends gathered at the home of Mrs. G. W. Fitzhorry to give her a surprise party on the occasion of her birthday. During the evening whist was played. Mrs. Fitzhorry won the ladies first and H. Dacre the mens. After the whist a splendid social evening was spent. The evening closed with refreshments. On the whole the evening was greatly enjoyed by all those who were present.

Brethren Young Folk Have Successful Social

Put on Good Program at Their Box Social.

The Brethren Church was well filled last Friday evening for the Box Social put on by the young people of the congregation.

The Committee in charge had prepared an excellent program every number of which was exceptionally well rendered and thoroughly delighted the large audience. So well did each performer do his and her part that it would be impossible to single out any one for special mention but the introduction of a darky skit put on by a number of young men in town made quite a hit with both old and young. The boys put on a good fifteen minutes entertainment, and many were eager to express the hope that the boys would keep together and practice for another performance.

After the program lunch boxes were auctioned off by Bert Shaw and good prices were realized. As a result of their venture the young people cleared about $40.00.

Local Legion Elects Officers For Year

President of Hat Legion Talks on Pensions.

At the regular monthly meeting of the local Legion held last Sunday afternoon the following officers were elected for the next year:

President— Bert Allison.
Vice. Pres.— Thos. Balmer
Sec. Treas.— R. Moore
Ex. Com.— Messrs. A. Patterson, A. Osgood, Bert Shaw, F. Jones and W. Yates.

A number of members from the Medicine Hat Legion were present and during the afternoon President J. Wright gave an interesting and informative address on the pension regulations.

Other business of importance was transacted at this meeting.

It was also decided that all those who had books for the Christmas tree drawing should hand in their stubs and money to the officials of the Legion by Saturday night of this week. The drawing for the prizes will take place in the Legion Club rooms on Monday evening next at 8 o'clock. All ticket holders are invited to be present.

Submarine Picture At Cameo Next Week

Despite the fact that is a motion picture, there is nothing "movieish" about the diving scenes in John Ford's newest Fox production, "Men Without Women," a thrilling story of the submarine service which comes to the Cameo Theatre next Wednesday.

The sequence in which the rescue vessels assemble above the doomed undersea craft and send divers down to clear the fouled torpedo tubes that the survivors may escape, was filmed exactly as it appears on the screen, on and beneath the Pacific Ocean.

Two of the Navy's crack "deep sea" experts, Chief Torpedoman J. H. Von der Wall and Arthur Geiring were obtained.

Kenneth MacKenna heads the cast. Frank Albertson, Farrel Macdonald, Walter McGrail and Paul Page also have prominent parts in this picture with an all male cast.

Don't forget the Midnight Frolic Christmas Night.

Beatty Makes Important Proposals Aimed to Assist Western Farmers

C.P.R. President Calls on United Canada to Rally to Help of Courageous and Loyal Pioneers— Such Action Just and Wise and In Interest of Entire Country.

Western conditions and what should be done about them formed the subject of a notable speech made by E. W. Beatty, chair-

man and president of the Canadian Pacific Railway at London, Ont., last week. In direct and simple style Mr. Beatty briefly analysed the western situation and put forward a series of suggestions for immediate and effective action designed to carry western farmers over the present period of adverse conditions. He stated that his suggestions were those of a private citizen made without the knowledge of any government authority in this country. He put them forward as the representative of a corporation which extended throughout all parts of Canada and was vitally concerned in the economic situation in any section thereof. There was in this important utterance no suggestion of anything in the nature of intended charity towards the West. The whole prospect, he said, should be directed by warm sympathy for a community of courageous pioneers threatened with distress and by a desire to provide just assistance where it is badly needed. There should be full appreciation of the fact that the prosperity of East and West, of farmer and city are inextricably linked together. He believed that the country as a whole would come to the assistance of a great section suffering from a temporary but severe depression from causes beyond its control, not only because it is just to do so, but as a wise measure of national policy. Mr. Beatty said in part:

"Western Canada is suffering from the effects of unusual world conditions in the marketing of grain and in its low prices, and hardship is being experienced on the prairies in consequence. I do not need to elaborate on the courage and the resourcefulness of the people of Western Canada, nor the confidence many of them feel in their ability to come through this depression as they have others. I do not require to do more than mention what we in the East owe to that part of the country, both in a material way and in the national strength contributed by the loyal people of that part of Canada. I should like to stress the importance of a knowledge of the conditions prevailing in those sections and of the necessity of co-operation in meeting unusual situations in the interest of the whole country. The former Government of Canada and the present Government have, at different times, adopted policies designed to strengthen the economic position of different sections of this Dominion. Through such policies, the position of our Maritimes has been improved, and through more recent changes in fiscal policies the position of the manufacturers of Canada is intended to be improved and the unemployment situation is likewise designed to be, in part, at least, alleviated by direct contribution by the Federal authorities to public works. If these policies be planned to accomplish betterment in certain parts and activities in Canada, then the same attitude may properly be adopted in relation to the peculiar problems of our western provinces. None of these suggestions which I propose have any relation to the question of marketing wheat, price fixation or otherwise, since these problems depend so much on world conditions. I am directing my observations to the problem of meeting emergent conditions of great hardship which may arise during the next four or five months.

"Obviously, our Western producers should not fear the loss of their equity in their homesteads in view of the frank unwillingness of mortgage companies and other holders of liens to press for immediate liquidation of maturing obligations or for arrears of interest beyond the ability of the farmer to meet his payments, so far, at least, as this is due to the present depression in the wheat market. The problem, however, do remain; the fear of want during the coming winter—confined largely to the smaller and financially weaker farmers—and the fear of inability to finance another year's farm operations.

"To me, an unprejudiced and unofficial, but not disinterested, observer, it seems inequitable that the Dominion Government should not hesitate to intervene with an offer of assistance as a national public duty. The governments of the three prairie provinces, owing to their inadequate sources of local revenues, are best adapted to provide relief, but owing to their pledgings of their credit as security for bank loans to the Wheat Pool, they may need Federal assistance in the matter. If the Dominion Government were to agree to assume a portion of the obligations regarding the 1929 crop, and the provinces were to use this release of their credit to permit them to assume the full burden of relief to their citizens, the aid of the Dominion Government would be given in a useful direction, and the operation of relief measures by those best equipped for the task would be assured. These obligations should be assumed by the Dominion Government only to an amount equivalent to actual relief expenditures by the Provinces in aid of farmers. Since it is inevitable that some critics will assert that this is specific aid to members of the Wheat Pool, it may be well to point out that the reverse is the case. The guarantee of the Pool loans by the Provinces might be so regarded; although even in that case the Provinces were unquestionably moved by a desire to save a collapse of the wheat market that would hurt Pool and non-Pool farmers alike. The suggestion that the Dominion Government now assume those guarantees is made solely to enable the Provinces to direct their best efforts to the relief of all their farmers, Pool members or not.

"I would suggest, too, that as a further aid to the restoration of confidence and as an evidence of complete faith by important business interests in the future of agriculture in the West, an agriculture credit corporation should be formed to provide livestock for farmers who wish to diversify their operations. The Company should be a private corporation, organized in somewhat the same form as that organized in the United States, with the support of the banks, Mortgage Trust and Loan Companies, Insurance companies and the railways, and, if thought advisable, perhaps of the Federal Government itself. The money should be repayable on easy terms, the risk would be small, and the administration costs would be reduced to a minimum through the voluntary nature of the undertaking. I would suggest that five million dollars be raised in this manner and that the project should at all times be treated as one of sound investment. This method of aid would be specially valuable, since many Western farmers would find their domestic economic problems greatly simplified by the addition of livestock to their farms, and since every head of livestock placed on a western farm aids in the marketing of surplus grain."

Mrs. Edward Gorham Passed Away Monday

Funeral To Take Place from the Gordon Memorial.

Although not enjoying the best of health for some time the news of the death of Mrs. Edward Gorham, of this town was a great shock to her friends and neighbors. She passed quietly away at her home on Fourth Street last Monday afternoon at 3:15 o'clock.

Deceased, who was 74 years of age, came to this district about 20 years ago with her husband and settled on a farm north of Bowell where they carried on farming operations for several years. About eight years Mr. and Mrs. Gorham moved to Redcliff where they have resided ever since.

Deceased, by her kind, generous and cheerfull disposition, made friends with all whom she came in contact. Despite her age and at times her infirmaties, she was always interested and well posted in world conditions and Canadian politics, and ever since women were granted the franchise she has gone to the poll to cast her ballot for what in her judgement was in the best interests of the country.

Besides her husband deceased leaves one son who resides in Toronto.

The funeral will take place from Gordon Memorial Church on Saturday afternoon of this week at two o'clock.

A New and Better Attitude

The world is passing through a period of depression from the evil effects of which practically no civilized nation is exempt, and the more highly developed and industrialized a nation has become, the more severely is it suffering from the prevailing depression. Undoubtedly, it is not wise to unduly dwell upon or stress existing hard times, and the tendency to do so should be resisted, but, on the other hand, it would be even more unwise to ignore facts, deliberately shut our eyes to them, and not make the required effort to overcome and shorten the present evil, seek for causes of it, and take necessary steps to prevent its recurrance.

There have been many such periods in the past, and there will, in all probability, be more of them in the future, despite all that man can do to prevent them. In fact, human failings and human greed are the underlying causes of these periods of depression, and their entire prevention will only be brought about by a complete reform of the human race. The present period differs, however, from former periods of depression in at least two important respects, both of which are the outcome of a changed attitude on the part of the vast majority of people towards our whole social and economic structure.

First, there is greater interest taken in relief measures than ever before by governments, corporations, and individuals alike. We no longer regard acute misery as necessary. We may not have learned yet how to prevent it, but there is a widespread and growing belief that the thing can be done and there is considerable willingness to make sacrifices to attain the desired end.

No longer is there callous indifference to the suffering caused by reason of unemployment. We have progressed to the point of realizing that the homeless casual laborer is not the only or even the principal sufferer in such times as these. We have learned to concentrate attention and relief upon the families of the unemployed who are permanent members of the community. We have come to realize that the difficulties of hundreds of thousands are not of their own making, and that they cannot be allowed to suffer want and utter privation. We have learned, too, that it is better to provide emergency relief work for these people than to hand out doles and make them recipients of charity.

Thus in this present period of depression we find relief works being undertaken on a scale hitherto unknown. In Canada, it means that over $100,000,000 will be expended in order to provide temporary work for those lacking employment. This, of course, is not a cure, but it is preventive. It is merely an amelioration of existing conditions. It means, too, that as a people we are mortgaging our future, because these $100,000,000 or more will be borrowed moneys upon which we must pay interest for many years to come. But it is better to utilize these moneys in providing work than to dole it out in charity. Furthermore, if the works instituted are of the right character, in a word, if they are of a permanent character and productive of good to the country in the years to come, and the money thereon is not wastefully expended, they may even prove factors in creating and maintaining a new prosperity and staving off further periods of depression.

But an even more important aspect of this present period of depression is discovered in the efforts being put forth to find out what caused the depression, and how to climb out of it, and how to avoid again falling into a similar state. We now realize that a good deal of the economic thinking of recent years has not stood the test of the last twelve months. But, as the Chicago Tribune puts it, we have not lost one product of boom times; we still think that it is the business of an economic system to make for human enjoyment. Economics is not the dismal science to this generation. We know we have the productive capacity to provide a generous minimum standard of living to all who will work and we regard large scale unemployment and consequent suffering as a reflection upon our intelligence.

It is one thing, of course, to believe that a deep seated ill ought to be cured and quite another to cure it. And while there is no justification as yet for thinking that this is the last depression which we shall ever encounter, there is a considerable warrant for a tempered optimism. Some of the ablest minds in business and in the universities are directed toward the problem. We have more statistical information which bears on the causes of the business cycle than ever before. We are developing a technique for alleviating the worst effects of depressions, which will be of value even if a cure is not found. The outlook is far from hopeless.

Power From Nelson River

British Dominion Syndicate Makes Offer To City Of Winnipeg

Offer of blocks of power from the proposed White Mud Falls development on the Nelson River in Northern Manitoba has been made to the city of Winnipeg by the British Dominions Power Syndicate, it is stated. The proposal made in a letter from Sir Reginald Brade, head of the syndicate, was referred to J. G. Glassco, manager of the city hydro system.

Commencing in 1935, blocks of power ranging from 20,000 to 100,000 horsepower would be available, according to the letter. According to Mr. Glassco the offer comes "ten years ahead of the game," and cost of transmission would be very cheap. A complete report will be submitted to the civic utilities commission at its next session.

Ready For Action

Mother was trying hard to arrange a match between her daughter and the wealthy young landowner.

"Beatrice," she said to her daughter, "if Harold asks you to be his wife tonight, tell him to speak to me."

Beatrice nodded, and then said: "And if he doesn't ask, Mother?"

"In that case, said her mother, "tell him I want to speak to him."

Blindness In Many Cases Is Preventable

Preservation Of Sight Should Be Taught In Schools

That one-half of blindness among children is preventable, and that the preventation of blindness should be first taught in the schools, is the opinion of Miss Mary C. McLelland, National Field Secretary of the Prevention Department of the Canadian National Institute for the Blind, Toronto.

Miss McLelland said that her department was in favor of text books with larger type being used, as they are in the States. A child with defective sight would have to strain to read small type at present used in text book publication. In order to consider the publication of such a book when the new reader for the western province comes out, a committee has been formed, with Dr. Fletcher, of Winnipeg, as head. A survey is also being made in an effort to have sight saving classes instituted in the larger cities, she said.

Television Is Improving

Spectators See Actors Distinctly At Distance Of Thirty Miles

Images as clear as those seen in the average motion picture theatre are projected by a television transmitter which has been tested in Germany. The spectators are able to observe the vividly clear pictures much as if they were at a moving picture show. The transmitter catches pictures with a sharp lens having a celerity of 50,000 light points a second. By the use of a photo-electric cell these light points are changed and transmitted on a 70-meter wave. Spectators 30 miles distance faced the lens and saw pictures of the actors with the utmost distinctness.

Danger from Colds

Every woman beyond middle age should realize that a majority of the troubles she has to fear have their origin in what are known as common colds. Each attack lowers her vitality and reduces resistance to disease. At this season of the year every woman should see that her blood is toned up to meet the rigors of the climate and especially that strength should be restored after any cold, grippe or flu. For this Dr. Williams' Pink Pills are a reliable tonic.

These Pills are not a mere stimulant giving temporary relief. They build up the body by creating that rich red blood which imparts the glow of health; steadies the nerves, improves the appetite and digestion and make the users capable of withstanding the rigors of our Fall and Winter months. They are sold by medicine dealers or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

British Columbia Apples

New Market For B.C. Apples Being Developed In South America

British Columbia apples now have a regular market at ports on the east coast of South America, according to F. C. Garde, manager of the Dollar Shipping Company Limited. This development of the British Columbia market was brought about by experimental consignments made by this company last year; this year's shipments representing an increase of 400 per cent.

Miller's Worm Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgement there when these powders are in operation. Nothing could be more thorough or desirable than their action.

Siam Entry For Grain Show

The Kingdom of Siam, through its Ministry of Lands and Agriculture, is making preparations to be officially represented at the World's Grain Exhibition and Conference at Regina in 1932. Siam's exhibit will consist of varieties of that country's best rice.

Large Sum For Civic Improvement

About two thirds of a million dollars have been expended by the City of Trail on civic improvements during the past seven years, according to the latest figures from the city hall.

Some People Lucky With Blind Purchases

King's Warehouse In London Sells Some Valuable Parcels

What the Lost Property Office is to an ordinary railway, the King's Warehouse, situated in Lower Thames Street, London, England, is to the Customs and Excise Department of the British Government. Here are dumped articles and merchandise left unclaimed by the individuals to whom they have been consigned, plus a considerable proportion of confiscated smuggled goods. From time to time these articles are put up for auction, and great bargains are not infrequently picked up. On one occasion a small casket, labelled "contents unidentified," was knocked down for a few shillings. When the purchaser took it home and opened it he found it to be nearly half-full of a solid, waxy substance somewhat of the appearance of marble which proved to be ambergris, that precious product of diseased whales worth about $50 an ounce. There were approximately 40 lbs. weight of it in the cask, and it was sold for above $30,000. Another time a lucky bidder obtained possession, for the sum of half-a-crown, of a small cardboard box, listed in the catalogue as containing "seabirds' eggs—various." On examining his purchase, he found among the eggs one of the Great Auk, an extinct species of sea-fowl. Later on, it realized at auction for its fortunate finder the nice little sum of $1,800.

"Audible Museum" In Berlin

Phonograph Record Made In 1908 Is Among Collection

The piercing wail of a grief-stricken Italian, the merry song of a Roumanian tailor, the whoop of an American cowboy and the lingering call of a Spanish night watchman are some of the exotic sounds which the non-traveller will shortly be able to hear in an "audible museum" soon to be established in Berlin under the direction of the Ministry of Posts. A recently found primitive phonograph record of Count Zeppelin's voice in which the father of the airship appeals to the German people for support of his project will also be included. This record dates from 1908 shortly after a disaster to one of his airships at Echterdingen, and includes the words: "In a few years my airships will conquer the world." Acting on the belief that appropriate sounds intensify the impressions a visitor receives from displays, the Ministry intends to incorporate a series of phonograph records with various exhibits, which interested folk may turn on and hear the voices of such men as Edison, Marconi, Lindbergh, and of others of historical interest, as well as sounds from other lands and other times in so far as they are collectable and recordable.

Proved His Honesty

A pick and shovel bought on credit 17 years ago from George Paine, an Ashtabula, Ohio, hardware merchant, has just been paid for. Paine received a letter, postmarked Michigan City, Ind., containing $2 and the following note: "Seventeen years ago you trusted me with a pick and shovel. I told you I would pay you the first time I found $2. I just found it today. Here it is. The honest men are not all dead yet."

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

Origin Of Common Expression

The expression "to put a spoke in the wheel" would suggest adding strength to a wheel, although actually the saying is used to indicate that somebody's progress has been barred. It has its origin, no doubt, in the far-off days when vehicles had solid wooden wheels. Holes were made in some of these so that the driver who wished to put on the brake could do so by pushing through one of the holes a piece of wood, called a spoke, and thus prevent the wheel from revolving.

Minard's Liniment refreshes the scalp.

Peace River Bacon

Bacon Hogs Now Shipped In Carloads From Peace River To Vancouver

Less than 20 years ago, the Peace River District on Alberta, an extensive area of country northwest of Edmonton, was considered even by some agricultural experts as unsuited for productive farming. It is now one of the best wheat and other grain producing areas in Canada and also is growing in importance in mixed farming. Bacon hogs are now being shipped in carloads to Vancouver. Among the principal buyers of the Peace River hogs are the Vancouver Department Stores. Housewives of that city say that the bacon from Peace River is of the finest quality and like Oliver Twist they want more.

One of the most recent Canadian winners of the world's wheat prize at the International Grain and Hay Show, Chicago, was from the Peace River country, namely, Herman Trelle, of Wembley. Joseph H. B. Smith, of Wolf Creek, Alberta, last year's winner, is also an Alberta farmer, but is located outside of the Peace River District.

Safety League Formed

Officers Are Elected At Meeting Held In Regina

A safety league for Saskatchewan has been organized following a meeting of representatives of the government with representatives of the cities and clubs of the province held at the parliament buildings, Regina.

Lieutenant-Governor H. W. Newlands was made honorary president, while Hon. A. C. Stewart, Minister of Highways, was elected president.

Other officers who were elected at the meeting included: Honorary vice-presidents, Premier J. T. M. Anderson, Hon. M. A. Macpherson, Hon. J. A. Merkley, Hon. F. D. Munroe and Hon. F. R. MacMillan, M.P.

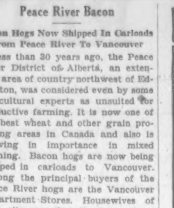
Vice-presidents, His Honor Judge W. O. Smyth, Swift Current; Sidney Smith, Regina; Richard Loney, Moose Jaw; Ralph Miller, Prince Albert; Mayor L. A. C. Panton, North Battleford; C. H. Garner, Weyburn; Mayor John W. Hare, Saskatoon, and Mayor Robert Barbour, Yorkton.

Why suffer needlessly? Douglas' Egyptian Liniment brings quick, sure relief to scaly feet, soft corns and warts. Relieves inflammation. Removes proud flesh.

Fifty-Fifty

"I'm afraid we've made rather a mess of your field," said the male member of the picnic couple to the farmer on whose grounds they were camping.

"Never mind," the farmer replied, "you should see the mess the village youngsters have made of your car."



Russian Coal Importations

Imports Of Soviet Coal Increased 12 Per Cent. Over Last Five-Year Average

Canada imported 51,578 tons of Russian anthracite coal during September, it was reported by the Dominion Bureau of Statistics. The total imports of coal increased 12 per cent. over the last five-year average. Practically all the bituminous and over one-half of the anthracite came from United States.

The domestic output during September amounted to 1,129,883 tons, a decline of 9.2 per cent. from the last five-year average. Nova Scotia mines produced 473,807 tons; New Brunswick mines, 14,109 tons; Saskatchewan mines, 32,780 tons; Alberta mines, 546,652 tons, and British Columbia mines, 163,026 tons.

An Oil That Is Famous.—Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

English Rhetoric In Germany

Difficulty Sometimes Encountered In Country Advertisements

The one advertising slogan everyone over in Germany understands is: "Say it in English."

In rare cases where the English in those announcements is less clear than one finds in advertisements, the text usually gains in flavor what is loses in rhetoric. For example, a certain resort assures prospective visitors it has "a cure that cures rheumatism, gout, sciatica, neuralgia, golf, tennis and fishing."

Suffered From Heart Trouble

Became Weak and Run Down

Mrs. Wm. Dlotte, Glensaddell, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

MILBURN'S HEART AND NERVE PILLS

Price 50c. a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay *fresh...delicious!* Para-Sani keeps them from" staling. Get Para-Sani in the handy, sanitary knife-edged carton. Army Of Enumerators Will Be Employed In Taking The Decennial Census Of Canada

Fourteen thousand enumerators, 245 commissioners to direct their work, and a considerable number of others, will find employment next year in the taking of the decennial census of Canada.

The commissioners — one for each electoral district—will be appointed right after New Year, while the enumerators will be chosen in March or April, to permit of study and instruction prior to the actual date of the census, which will be on June 1st. The census taking, of course, will require considerable time, varying in accordance with the area covered and the density of population. But what is to be put down are all the facts and figures as they may be on June 1st, regardless of what changes may occur later, before the census is published. It is necessary to fix some arbitrary date.

Awaiting the approval of the Government just now and to be promulgated as soon as this sanction is forthcoming are the regulations governing the census of Canada. There are several new features. Each successive census being more elaborate, past experience not only here but in other countries will be availed of. The Bureau of Statistics is constantly exchanging ideas with the international statistical organization. In the new schedules, complete as they have not been heretofore, there will be further details of agriculture and industry, and the point over which some contention has arisen as to Canadian nationality will be covered. A person who says he is simply a Canadian will be put down as such, although it is denied that in the past it was impossible to make such distinctions.

The census must also take into account some seeming anomalies in the law.

For example, under the immigration act, even a Britisher must be in Canada for five years before he can acquire Canadian domicile, and yet if he has been here only six months he can vote or even be eligible for election to Parliament. The schedules will be so numerous as to set forth all the facts concerning the individual and his origin from away back.

One of the entirely new features this time will be the use of aeroplanes in the northern regions, which, 10 years ago, had to be covered on foot or by canoe or dog train. Incidentally, the tabulation was delayed until these returns came in. Next year, they will be as prompt as the rest.

While the census is taken completely only every 10 years, check on it is kept from year to year, and the figures are such as to indicate a normal growth but no extraordinary increase in population. Although quite an army of competent people will be required for the census business, the problem will be only one of selection, because there will be plenty seeking the jobs. The appointments are to be made by the Government and not under the Civil Service Act, and so political influence may count.

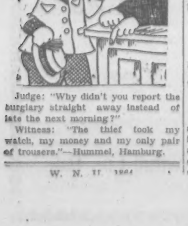
Predicts Speedier 'Planes

Rocket Craft Expert Believes 5,000 Miles Per Hour Possible

Herr Fritz Von Opel, German rocket craft expert, predicts the airplane of 12 years hence will be a rocket propelled conveyance that will fly 25 miles above the earth at a speed of 3,000 to 5,000 miles an hour.

"I nok it sounds ridiculous to talk of travelling 5,000 or even 3,000 miles an hour," said Von Opel, "but in a few years that speed will be commonplace. Theoretically my experimental 'planes will do that now, but they have not been developed on a practical basis."

The United States has at least 85 species of native golden rod.



Judge: "Why didn't you report the burglary straight away instead of late the next morning?"

Witness: "The thief took my watch, my money and my only pair of trousers."—Hummel, Hamburg.

Encourage Swine Industry

Saskatchewan Government Arranges For Easy Purchase Of Breeding Stock

Encouragement of the swine industry in Saskatchewan is promised under a new arrangement, according to Hon. W. C. Buckle, Minister of Agriculture. Under this arrangement, farmers will be enabled to purchase sows for breeding purposes through the Department of Agriculture upon making a payment of 25 per cent. of the cost and giving notes for the balance.

"In recent years, while we had a 50 per cent. cash option for the purchase of swine," Mr. Buckle said, "most farmers preferred to pay cash. This year on account of the scarcity of money, we are inaugurating this new plan."

YOUTHFULLY FLATTERING HOUSE FROCK ADOPTS EMPIRE LINES—SUITABLE MISS OR MATRON

You'll like its slendering lines. The pointed treatment of the gored skirt emphasizes the smart quaint basque bodice. The partial belt arrangement does much toward concealing hip breadth. The open V-neckline with pointed collar is particularly becoming.

It's the choice of the smart woman who is always fastidious in the selection of her home frocks.

It's easily made.

Style No. C-891 may be had in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust. Size 36 requires 3¼ yards of 36-inch material with ⅝ yard of 39-inch contrasting and 4¼ yards of binding.

It's very attractive to have one's house frock agree with the kitchen colour scheme.

It is sketched in deep blue and white dimity with white pique collar and blue bindings.

Men's striped cotton shirting, tiny gingham checks, pin dotted broadcloth and tweed-like cottons make up lovely in this model.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Would Require Simplifying

English would make the most suitable international language, if its irregular spelling could be simplified and a few other complexities smoothed out, a Swedish professor of languages argues.

Substitution Of Barley For Corn

Experimental Stations Are Testing Feeding Value Of Both

A question which is causing considerable study this year is that of reducing the amount of corn purchased by Canada and the substitution of barley, a home-grown feed. The feeding value of barley as compared to that of corn is being given careful study at several experimental stations and already here have been several definite recommendations made for the use of this grain in at least partial replacement of corn.

The large part of the Canadian importations of corn go to the feeding of hogs and poultry. For the former, the barley has been long proven to rival corn as a feed both in its value as a fattener and for a part of the ration of the growing hog. The quality of finish produced by barley, in conjunction with oats or other feeds is generally believed to be superior to that of the corn-fed.

In the poultry industry, the use of barley in place of corn is not nearly so well established. There is a certain vitamin value obtained from the use of yellow corn in the poultry ration which is rather difficult to replace when other feeds are substituted. General indications are, however, that the corn content of the laying mash can be substituted at least partly by barley and, with the ordinary spread in price between the two, it will probably be found profitable to do so. For fattening chickens there is reason to believe that a good percentage of well ground barley in the feed will work out quite satisfactorily.

Barley and corn are both known as high carbohydrate feeds, and, with the exception of the difference in hull formation and in the vitamin content of the yellow corn pigment, may be considered in much the same light as fairly strong, heat producing and fattening feeds. Should the price spread favor barley to any extent during the coming winter and especially if the feeder has a quantity on hand, he should be quite safe in using a considerable portion of it in place of the corn he might ordinarily buy.

Saskatoon Poultry Association

Egg Laying Contest Organized To Run For a Year

The Saskatoon Poultry Association has organized an egg laying contest, beginning November 1st to run for a year on similar lines to that of the Dominion Government. The object is to secure for members of the Association trap nest records of individual birds for the twelve months which will furnish valuable data to those who are desirous of increasing the egg-laying propensities of their flocks, but who have not time nor facilities for conducting the breeding of true-to-type birds that will lay a profitable number of eggs of good size and color.

B.C. Motor Truck Company

A motor truck manufacturing company established in Vancouver 21 months ago at a cost of a quarter of a million has been very successful, its production for the first nine months of the year more than equalling that of the whole of last year.

She—"Silence gives consent, you know."

He—"Except when you ask a banker for a loan."

Policeman—Miss, you were doing sixty miles an hour!

She—Oh, isn't that splendid! I only learned to drive yesterday!

Canada's Fish Industry

Should Get More Support From Canadian Consumers

Business can be stimulated and more work can be found for our own people through the persistent purchase of Canadian instead of foreign goods. In no sphere of life can this policy be more easily followed or its good effects be more quickly seen than in the every-day use for the household, especially of food. It is strange that though Canada has the finest fisheries in the world, the consumption of fish at home is relatively small; and, at the same time, we seem to think it necessary to buy considerable quantities of foreign fish year after year, the imports in 1929 amounting to no less than $4,174,568.

If we reduced the imports of foreign fish and eat more of our own fishing industry would benefit enormously, and no industry is more worthy of encouragement. Fishermen, both inland and on the two seacoasts, are plain people who buy almost exclusively goods made in Canada. Is it not reasonable for consumers in Canada to reciprocate by making more use of Canadian fish, and thus to increase the purchasing power of Canadian fishermen? The industry has an importance which perhaps people who live inland do not appreciate, for the capital invested in it is nearly $60,000,000 and the annual production is worth more than $50,000,000. The money realized from the fisheries is spent with manufacturers of iron, brass, rubber, cordage, flour, textiles, engines, clothing—in fact, its ramifications are felt throughout the country, and directly or indirectly it gives employment to many thousands of workmen, hundreds of miles away from the scene of operations. If each family in the land consumed even a few more pounds of Canadian fish it would give a great stimulus to an industry which already contributes so largely to the prosperity of Canada.—Toronto Mail and Empire.

Livestock Sales

Figures For Past Ten Years Shows Heavy Business Done At Moose Jaw Stock Yards

"During the past ten years," says "The Optimeter," "some 792,994 cattle, 51,081 calves, 696,345 hogs, 258,944 sheep and 15,112 horses were were handled through the stock yards at Moose Jaw, according to figures computed by the Southern Saskatchewan Co-Operative Stock Yards. In other words, more sheep and swine were handled through the Moose Jaw yards in the period under review than the entire number of sheep and swine present in Saskatchewan in 1926." In that year there were in Saskatchewan 1,166,913 cattle, 207,551 sheep, 599,909 swine and 1,122,757 horses.

Punished Enough

The scene was a revival meeting, and during the course of the evening a masculine woman rose and spoke on the value of kindness. "Look at my husband," she said. "He's allus been a terrible trial; but how does I treat him? When he comes home from The Pig and Whistle the wuss for drink, what does I do? Do I hit him? No. Do I swear at him? No. Do I clear out an' leave 'im? No. I just puts me arms round his neck and kisses him."

A voice from the back of the hall called out, "Serves 'im jolly well right."

Howell—Do you work for a living?

Powell—I work for it, but I don't get it.

HEAVY WINTER TRAVEL IS PREDICTED

Here in picture are some of the reasons advanced by Canadian Pacific Railway and Steamship officials for a prediction of heavy winter travel on the prairies this year. Lower left, a scene at the Empress annual mid-winter golf tournament in Victoria, to be held this winter from February 23 to 28, with, top right, a drawing of the E. W. Beatty challenge cup, the principal emblem. Top left, the Canadian Pacific steamship "Duchess of Bedford," with other ships of the line, will take thousands of holiday makers to the Old Country for Christmas. Lower right, a scene at the annual Banff Carnival, to be held after New Years at the mountain resort.

Study Of The Whole Field Of Federal And Provincial Taxation Is Thought Necessary

The ever widening problem of raising revenue for administration purposes and public undertakings by both provincial and the federal governments, has reached a stage that calls for thorough examination of the whole field of taxation, according to views advanced at the convention in Toronto, of the Canadian tax conference and the Canadian civil service research conference.

With delegates in attendance from widely separated parts of the Dominion, the conference applied itself to the study of the country's tax structure and offered suggested remedies in meeting some of the more outstanding problems.

Duplication and lack of uniformity in taxes levied in the various provinces, should invite tax reformers into action, declared A. E. Crysler, of Toronto Board of Trade. Lack of uniformity, he said, proved a baffling problem for business interests operating over a large section of the country, while overlapping arising in connection with the income tax was often considered "unfair."

In a paper submitted by Prof. H. R. Kemp, Department of Economics, University of Toronto, two primary problems were set forth: How to secure increase of revenue, needed to meet the commitments of the Dominion, and how to improve present arrangements for obtaining revenue.

The Federal Government, he said, faced a deficit of about $40,000,000 while the provinces and municipalities were also confronted with the need of augmented revenues to meet obligations and undertakings. As means of meeting these needs he suggested excise duties might be levied on certain low-priced commodities, citing sugar as an example. This suggestion, however, met with disfavor in the subsequent round-table discussion. Prof. Kemp believed there were other channels of revenue that might be explored, with the federal income tax probably slightly raised.

As a remedy for some of the existing tax evils, Prof. Kemp advised a thorough investigation into the double taxation of corporation incomes, periodical conferences between provincial authorities, and a general study by everybody interested of the whole subject of public debts and taxation.

Alluding to taxation in relation to the country's net production, Mr. Crysler declared that in 1928 the increase in taxation revenues had been more rapid than the increase in the total net production. In that development he detected a dangerous portent. "We may soon have the heaviest taxation of all imposed on the citizen in the leanest of all years," he said.

A paper by J. G. Hay, Commissioner of Taxation in Winnipeg, dealing with assessment of urban land for taxation purposes, provoked general discussion.

Mr. Crysler, reviewing taxation changes in 1930, stated the present trend was to extend the gasoline tax and relieve income tax payers. It was recognized, he said, the income tax was unpopular because of its tendency to penalize the honest to the advantage of the dishonest. He forecast a "lively legislative interest" and a "progressive softening" of the income tax.

A one-cent-per-pound tax on sugar said Prof. Kemp, would raise at least $9,000,000 a year for the Dominion. "Sugar," he argued, "is now selling at a price no higher than that prevailing before the war, and at less than the cost of production. Such a tax, though retrogressive, would perhaps not be unduly burdensome to consumers who have paid over 25 cents a pound for sugar in the past."

Two prominent Toronto business men, William C. Coulter and George Brigden, led the general attack on the proposed sugar tax. Mr. Brigden asserted the governments of the world received an all time lesson against excise taxes on such necessities when Britain lost the American colonies through the tea tax.

It was also suggested by Prof. Kemp that collection of municipal income taxes be made by the federal authorities, who would then turn the amount over to the municipal authorities. This, he said, would increase the net revenue from the tax. "Various public utilities also could yield large revenue in case of necessity," he added.

Shows Great Variation

Every Country Has Its Own Manner Of Eating

Nothing is more curious than the different manners of eating which are correct in different countries. We leave succulent gravy on our plate, because good manners forbid that we should soak it up with a piece of bread. Yet in France to leave that gravy would be considered extremely rude, and the daintiest eater would certainly chase the last delicious drop round the plate with a soft piece of bread. The correct way to sup soup with us is from the side of the spoon, but to do this in Germany would mark one as not knowing the habits of polite society; there it must be imbibed from the end of the spoon. Another—to us—curious custom is the French one of resting the hands always on the table, directly they have finished a course; to sit with them in the lap is not good manners.

This reminds us of a story a woman told once of a foreigner her father asked to the house. At dinner the first night asparagus was served, and the visitor, having watched furtively what other people did, ate it in his fingers as to the manner born. The next night leeks appeared as a vegetable, and the young man, quite sure of himself this time, started on it happily, taking it in his fingers as he had done the asparagus. Now, did the laws of perfect breeding demand that all the people in the house should follow suit, or not? It is related of a perfect host that on one occasion when entertaining some visitor whose table manners were not very civilized, and who took up his finger bowl, and drank from it, he, after one glance round the somewhat astonished table, took up his finger bowl, and also drank from it!

The Magnetic Compass

The magnetic compass has been in common use for more than 700 years and it is more widely used today than ever before. On the seas, under the seas, on, above, and under the earth it is used for finding direction. It is necessary to the sailor afloat or in a submarine; to the surveyor and explorer on land; to the airman who flies overhead and to the miner who burrows below in deep pits.

The pathway to success may be uphill—but it never is crooked.

Champion Sheep Shearer

Interesting Contest At Saskatchewan Annual Sheep and Swine Show

H. Swinehart, Huntoon, was adjudged the champion all around sheep shearer when a contest was held at the exhibition grounds, Regina, in connection with an annual Saskatchewan sheep and swine show. A. Simpson, Regina, gained second place in the contest, which was judged by W. C. Heron, Huntoon; L. J. Rushton, Rocanville, and W. W. Thomson, western manager of the Canadian Co-Operative Wool Growers Association.

Sheep shearing results follow:

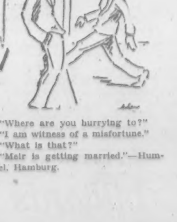
Hand shearing contest—1. A. Simpson, Regina; 2. H. Swinehart, Huntoon; 3, Archie Stewart, Abbotsford; 4. Calvin Fraser, Mather, Man.; 5. J. Whitehead, Nutana, Sask.; 6. Ben Wilson, Shellbrook; 7. J. Bayne, Semans; 8. John Brisbane, Laura.

Machine shearing contest—1. H. Swinehart; 2. John Jones, Bangor; 3. J. Whitehead, Nutana.

Arthur Howes, Huntoon, was announced the winner of the Heron challenge cup, donated for annual competition by W. C. Heron, Huntoon, Sask., for the best Saskatchewan bred Oxford sheep, three years or under. The cup was won in 1929 by A. M. Barnett, Huntoon.

New Exchange Building

The officials of the Winnipeg Stock Exchange are being commended for their decision to go ahead with their construction programme which involves a new exchange building to be erected on Main Street at a cost of about $25,000.



"Where are you hurrying to?"

"I am witness of a misfortune."

"What is that?"

"Meir is getting married."—Hummel, Hamburg.

Advertising Rates Furnished on Application

Ed. L. Stone, Editor and Prop

THURSDAY, DEC. 18th., 1930

Last week 970 letters came in one day to the radio office of the Canadian Pacific Railway from Melody Mike fans. They came from cities, towns and villages all over Canada and included many from the United States. It is an all-Canadian radio feature declared by radio station people to be, with one exception, the most popular feature on the air today.

The Emperor of Japan is among the recent new customers for British Columbia pure-bred poultry. A consignment of selected birds which sold for $4590, from some of the best poultry farms in British Columbia, was recently shipped to the Imperial farms. Each of the hens in the consignment has a record of 200 eggs or better per year.

Entered in competition with several countries, an exhibit of game trophies from British Columbia recently won highest award at the famous Leipzig (Germany) Fair. It included giant moose, deer, wapiti, sheep and goat heads and skins of fur-bearing animals.

Among the events of major importance to distinguish the coming winter sports season in Quebec will be the International Dog-Sled Derby to be held February 18-21 over a 125-mile course. It is expected Emile St. Godard, four times winner of the trophy, will defend his title. The Masquerade Ball at the Chateau Frontenac will be another high light on February 20. Other events will be the International Convention of Snowshoe Clubs from Canada and New England and the annual ice canoe race through the floes of the St. Lawrence about the middle of February.

The sporty seaside lay-out of the Victoria Golf Club where the third annual mid-winter golf tournament will be staged from February 23 to 28 came in for unstinted praise from Gene Sarazen, former United States open champion, and Al. Espinosa, of Chicago, interviewed recently. "I thought Victoria would be a land of ice and snow around this time and that Vancouver Island was a suburb of the frozen north," he said. His visit provided him with one of the surprises of his golfing career and both climatically and from the golfing point of view, Victoria was in both his and Espinosa's opinion ideal.

Making fast time in handling the annual inbound movement of the fruit, now as much a part of the Christmas board in western Canada as the turkey or mistletoe, a Canadian Pacific train of 26 cars carrying about 60,000 boxes of Japanese oranges reached Field recently after making the run through the mountains from Vancouver in fifteen minutes less than scheduled passenger train time. By mid-December it is calculated that 700,000 boxes of these oranges will have been delivered.

Colorful Yuletide pageantry, including the ceremony of bringing in the boar's head and Yule log will be observed at the Empress Hotel, Victoria, Christmas Day and carol singers, a chef in Elizabethan costume attended by page boys and a court jester in cap and bells will accompany them through rotunda and dining room to the place of honor where the Lieutenant-Governor R. Randolph Bruce who is sponsoring the celebrations, will be seated.

Air Mail Service

One Hundred and Seventy Tons Of Mail Carried By 'Planes East and West

For the three months ending September 30, the aircraft engaged upon the 12 air mail services which now operate in Canada carried 119,301 pounds of mail, bringing the total from the beginning of the current year up to 370,424 pounds, or roughly 170 tons. One half of the services operate out of Montreal.

Two new services are projected, according to the quarterly report of the civil aviation branch of the Department of National Defence. . One will run from Ames to Sioux in Quebec, 42 miles, and the second from the Peace River to North Vermillion in the North West Territories. The latter calls for 16 return trips during the winter and will be continued for four years.

The report shows that there are 500 aircraft flying in Canada, while the number of pilots is 717, of whom 403 are commercial pilots. The Dominion has 72 air harbors.

Exceeding Eastern companies in mileage, were the 'planes of Western Canada Airways Ltd., Winnipeg, Man. These flew 413,013 miles, carrying 5,564 passengers, 316,893 pounds of baggage and express and 76,572 pounds of mail. The percentage of regularity on schedule times was rated at 97.4.

The report says that 14 intermediate airdromes are being leased, fenced in and graded with runways between Moose Jaw, Saskatchewan; Saskatoon, Saskatchewan, and Lethbridge-Edmonton, Alberta, a distance of approximately 500 miles. An airways beacon is being installed on one corner of each airdrome, while five radio beacons are being installed at present at Forrest, Man., Regina, Sask., Maple Creek, Sask., Lethbridge and Red Deer, Alberta.

There are 71 light aeroplane Clubs in the Dominion. For the nine months ending September 30, memmonths ending September 30, members of these organizations had flown 11,567 hours. The membership totalled 2,887. Ontario has the largest number of flying clubs, with nine. Saskatchewan has three, Manitoba and Alberta, two each, British Columbia, one.

A Boon To Motorists

New Non-Skid Road In Chelsea, England, Pronounced Success

A road surface which, it is claimed, eliminates all danger of skidding, is now being manufactured from Boston asphalt, mined in the island of that name in the Dutch East Indies, and a recent demonstration in the borough of Chelsea, England, was regarded by the borough engineer and others as a success. After the road which had been treated with the material was watered, a number of motor cars were driven along it at high speed and brakes were applied violently, but there were no traces of skids, and when the drivers tried deliberately to make the cars skid they could not do so. Its non-skid qualities are believed to be due to a natural and uniform mixture of bitumen and shells.

An Interesting Building

Jerusalem Chamber Near Westminster Abbey, London, England, Has Historical Associations

At the foot of the Wren Towers of Westminster Abbey, is a low, grey stone building known, after certain tapestries which used to hang on its walls, as the Jerusalem Chamber. It was built by Abbot Litlyngton in 1376, and in it the abbots of Westminster entertained their guests. Here died Henry the Fourth, and here Henry the Fifth became King. Here the Committee for the revision of the Bible worked for four years. Here Addison and Sir Isaac Newton lay in state. This beautiful chamber is cedar-panelled, and contains fine ancient glass and a contemporary portrait of Richard the Second.

"Late again. Have you ever done anything on time?"

"Yes, I bought a car."

He: "Remember, darling, that the doctor has forbidden you to bathe."

She: "Yes, but he hasn't forbidden me to wear a bathing costume." — En Rollig Half Timma, Gothenborg.

What Machinery Does

Displaces Labor But Makes Vast Number Of New Industries

An English newspaper which makes a feature of publishing extracts from its files of one hundred years back included one recently which stated that "an assemblage of about 400 agricultural workers at Hardneck, Kent, proceeded in a body to destroy the threshing machines in the neighborhood."

England was then much more of an agricultural nation than it is now. The lower classes were largely a peasant people to whom farming represented a ready source of employment, and it is quite natural that they should regard with dismay the introduction of machinery that tended to supplant manual labor.

The same thing happened fifty years earlier when Richard Arkwright invented machinery to do the work of cotton spinners. Mobs destroyed his machinery and burned down his mill at Chorley, Lancashire. But machinery has been of untold benefit to farms, and it made cotton about the biggest single industry in England.

Men could scarcely be blamed for their attitude toward machinery in those days. They could not foresee the revolution it would bring about, nor the markets it would create by cheapening and increasing production at the same time. Had the example of those workers been generally followed and a ban put upon the introduction of machines in all forms of industry, human progress and prosperity would have been held back to a degree that is incomprehensible.

Machinery displaces a lot of labour in some respects, but at the same time it made a vast number of new industries, including that of making machinery itself. Taking the widest view of the circumstances it is doubtful if machinery has ever displaced a single workman.

At the beginning of this century, there was an infinitesimal number of automobiles. Had a powerful farm bloc in every Parliament in the world pushed through legislation to ban the "horseless carriage," (as it was originally called), on the ground that it would injure the horse breeding industry, what would have been the state of world unemployment today?

Ten years ago there was no commercial radio. Today hundreds of thousands of people are engaged, directly and indirectly, in the vast service of broadcasting. Were radio sets not turned out by the million every year, those people would swell the ranks of unemployed.

And who can predict what new industry will be employing hundreds of thousands of men and women ten years hence?—St. Thomas Times-Journal.

The Woman Farmer

Increasing Number Taking Up Agricultural Work In England

The Over-Seas Daily Mail (London), says: Quite one of the most pleasant spots in which to ramble in this England of ours today is the neighborhood of a training farm for girls — one of those farms which are mainly in the hands of those efficient young women who are happily more numerous than used to be the case. Here you seem to have been transported into a youthful world of abounding health and vigor.

I am told that more women than ever are taking to agricultural work; many with the idea of seeking homes in one of the Dominions ultimately, others as gardeners or poultry women at home, and others to use the latest farming knowledge on parental farms. Established farmers seem keen enough now to give their daughters really practical education of the latest and best kind at the best available schools, so that they can be of use not merely for the dairy work but in all branches of the industry.

Large Amount Of Mail Carried

According to the Postmaster-General's annual blue book, 8,274 pounds of mail were carried on the Winnipeg-Calgary and Regina-Moose Jaw-Edmonton air mail routes during the department's fiscal year ending March 31, 1930. In all 180 single trips were scheduled and 173 actually carried out with a total of 82,653 miles flown. On all Canadian routes during the 12-month period, some 25 in all, a total of 425,280 pounds of mail were carried and 688,219 miles flown.

Doctor Defends High Heels

High heels have kicked up a lot of discussion, pro and con, but have found a staunch defender in Dr. Frazer Gurd, of McGill University Medical School, Montreal. The elevated heel, he told the practitioners attending the International Medical Assembly at Minneapolis, not only eliminates the curse of flat feet, but prevents the wearer from fracturing her ankle in case of a fall.

...ms C. P. R. Scholarship

Clifford Brown, Lennoxville, Quebec, has been awarded the Canadian Pacific Railway scholarship at MacDonald College in connection with the Junior Calf Club competition held recently at Sherbrooke, according to an announcement made by Dean Barton of MacDonald College. The successful candidate entered the Diploma Course at MacDonald, commencing on November 3.

One hundred boys from calf clubs throughout the province took part in those competitions and, of these, thirty-seven were eligible to compete for the scholarship offered by the Canadian Pacific Railway Company. These thirty-seven boys came from twenty-one different clubs and seventeen counties in the province extending from Argenteuil on the north shore of the Ottawa to Temiscouata on the south shore of the St. Lawrence.

Clifford Brown, a member of the Lennoxville Calf Club, obtained a score of 543 out of 600 on judging, 96 out of 100 on his general efficiency as a club member, 45 out of 50 on an oral examination, and 35 out of 50 on his exhibit, a total of 719 out of a possible 800 points. His nearest competitor was Stanley Doig of St. Jerusalem Club, in Argenteuil County, who obtained a total score of 714 points.

The scholarship is tenable at any agricultural college in the province of Quebec, and the winner elected to attend MacDonald College.

Housekeeper Gets Exercise

Walks Yearly Distance Equal To San Francisco From Boston

For some time elaborate tests have been conducted to ascertain how far various types of people walk as they do their usual work or play.

It has been learned that we average almost 8 miles a day, although a policeman was checked at 14 miles a day and a letter carrier at 22. A golfer walked 8½ miles playing 18 holes (no mention was made of his score).

A housekeeper, without leaving the house, walks every year a distance equal to that from Boston to San Francisco, but when this woman goes down town to shop she averages about 8½ miles in the stores alone.

The Geodetic Survey Of Canada

The Geodetic Survey of Canada, of the Department of the Interior, plays an important role in the development of the Dominion, providing by its work an accurate basis for all kinds of other surveys whether relating to the making of maps or charts, the laying down of interprovincial and other boundaries, or the construction of power-houses, dams, canals, railways, irrigation ditches and the like.

Flood lighting of church exterior is being tried in England.

Mind Would Keep Pace

Natural To Suppose Healthy Old People Would Have Active Brain

An eminent United States surgeon and doctor, discussing efforts being made to extend the span of human life, has stressed what he considered the futility of added years of bodily strength if the mind continued to weaken about the usual time. But would it? Isn't it logical to suppose that if the sound body be carried on toward the century mark in man's life the sound mind will keep it company? This authority rather scoffed at the idea of promoting greater length of years, but this is not a good attitude to adopt toward old people. There is nothing more beautiful in life than serene and happy old age accompanied by good health, even though physical strength be weakened.

The garnered wisdom of a life well lived develops in the minds of old people a philosophy that should be the envy of those who still are struggling in the vortex of world activities, competing in the mad race for wealth, fighting for eminence in public affairs, striving after social distinction and the other evanescent glories of the world. Old people do not care anything about these things. They have seen wealth vanish in a day; they have seen the public turn and rend its favorites of yesterday; and they know that the top of the social ladder is a position of the greatest peril.

If youth would listen to old age, benefit by its advice and experience, and pursue a more rational method of living, there would be more vigorous centenarians than there are today, and no doctor or other authority, no matter how eminent, would dare hint that they are only in the way. Longer and longer live the old folk!—Toronto Globe.

Playing Steady Game

Good Golfer Tells What Is Wrong With Business

The business visitor responded to the usual question of "How's business?" with this parable.

"I play golf and enjoy it. My normal game is somewhere around the middle 90's. The other day everything was just right, my temper and my digestion and the weather and the greens and all the things that help or hinder the game. The result was that I made a 79.

"Now suppose when I was asked what sort of a game I play, I should say, 'Oh, I break 80.' Suppose I should feel that everything was working very time I don't land in the 70's. What kind of time would I have as a golfer?

"And that's been one of the troubles with business. Many companies have been 80 in the hole since 1929, and because they failed to do it in the first half of 1930 they think they are completely ruined when, the truth is, they are playing a good steady game and improving a little bit every day."—Nation's Business.

Chinese Taking Over Jobs

The day when a foreigner could obtain a good job with the Chinese government and amass a fortune in a few years, is apparently over. Highly trained Chinese are replacing foreign employees in almost every branch of the Chinese government service. A month now seldom passes but what several foreigners who thought they had life jobs, see their posts turned over to the Chinese.

Canada's First University

In the town of Windsor, Nova Scotia, a tablet has been erected by the National Parks of Canada Branch, Department of the Interior, commemorating the founding of King's College, in 1789, the first university in Canada and the oldest in the British overseas dominions.

JAPANESE STUDENTS AT TORONTO UNIVERSITY

Above are shown Miss Patricia Sugarmori (left), young Canadian-born Japanese Varsity student of Vancouver, and Miss Tami Maruyama, another young lady of Japanese birth, who are the feminine representation in the newly-formed Japanese students' club at the University of Toronto.

Problems Of the Farm

Chances Have To Be Taken On All-Round Profitable Harvest

That famous airship whose destruction brought consternation to the world of science and of enterprise, perished on the millionth chance. "She's as safe as a house," said the designer of her sister ship, "except for the millionth chance." Unfortunately for her, the adverse powers that lurk about every life and every enterprise saw to it that this triumph of human skill and daring should be confronted by that chance. When so faced up, this mechanism designed to show man's conquest of the air proved as helpless as a bubble in Niagara gorge.

Farmers are continually confronted with the millionth chance. Some seem to be able to dodge the issue or what is more likely, they are dealt with so tenderly by the forces that work for man's defeat that they really never have any serious difficulties. In many cases these folk listen to their own councils, or, what is more fatal still, they listen to the words of the flatterer and become a little more daring and reckless generally. Then the millionth chance emerges and the cards have not fallen profitably. The grain is caught with heat or drought at the wrong stage of its development or they sell at the wrong period of the market or investments go wrong persistently and proud man is tossed up on the shores of failure. For a farm has more problems than any airship in existence. The dairy, the poultry yard, the field—all of these bristle with problems. Then there are all the risks of the market and of social life. Wise folk sometimes smile at the farmer's maxim "You never can tell"; but those few words express precisely the atmosphere in which the farmer persistently lives. An airship is far more likely to make a successful voyage than is a farm likely to yield an all-round profitable harvest.

Light In Ocean Depths

Recent Discovery Shows It Is Purest Violet Color

Levels of the ocean provided with violet-colored daylight, like a scene in the theatre illuminated with the purest violet light, are reported by the American Museum of Natural History as a recent discovery of the expedition of the New York Zoological Society now exploring the waters around Bermuda. Dr. William Beebe, leader of the expedition, made fifteen deep-sea dives, some to depths of over 800 feet, using a new steel diving sphere. Windows of clear fused quartz withstood the outside pressure of over six hundred pounds to the square inch and permitted the observers to look out. Close to the sea's surface, they found, the light was ordinary daylight but as the sphere descended all red and yellow colors of the spectrum faded out completely. Next the blue colors faded, leaving nothing but the pure violet rays at the extreme end of the spectrum where the wavelengths of light are shortest. At depths of 700 feet and below, the outside world of water still seemed to glow dimly with these extreme, almost colorless violet rays.

Resume Reindeer Trek

Delivery Of Herd From Alaska Will Likely Be Effected On Time

Canada's herd of 3,000 reindeer is once more on the trek across the roof of the world. Latest advices to the Interior Department, at Ottawa, indicate the drive of those animals, which was temporarily suspended during the summer and fall months, has been resumed and delivery of the animals to the eastern slopes of the Mackenzie River delta will probably be effected on scheduled time.

When the drive began last November, the stipulation was that the animals reach the grazing grounds near the mouth of the Mackenzie River early in 1931. Purchase of this number of reindeer from the Lomen Corporation of New York was made by the Canadian Government in order that the Eskimos and Indians in that northland might have their food supplies supplemented.

Private 'Planes In England

The number of privately-owned aeroplanes is steadily increasing in England. Nearly 300 men and women in the country now operate their own 'planes and more than 24 own two or more ships each. Many business men are securing 'planes for their salesmen, and one quarry uses 'planes to send out samples of stone by air to its customers.

Captain and mate wrote the ship's log alternately, and the mate being drunk, the captain faithfully recorded: "The mate is drunk today."

On the following day the mate, seeing what had been entered concerning himself, faithfully recorded: "The captain is sober today."

Prevention Of Diphtheria

Diphtheria Can Be Wiped Out and Lives and Dollars Saved

If for ten years or less, Canada were to pay as much money towards preventing this disease as Canadians now pay for curing it and burying its victims, it could be virtually eliminated. And yet at the present time 13,500 Canadians experience capon-ative and dangerous attacks each year, with 1,200 annual fatalities.

So you see, a great national work is being left undone.

How does diphtheria kill—and how can its ravages be averted? First of all it is a germ disease. A healthy human child (children are diphtheria's victims for the most part) who happen to be susceptible to this disease, is suddenly attacked by a number of tiny, invisible germs. These lodge in the youngster's throat and feed and multiply. They give off a waste product which is a deadly poison, and this poison spreads throughout the system. A victim of diphtheria dies of poisoning, just as surely as though he had swallowed prussic acid.

However, death as we know does not always result, for the germs do not have things all their own way. Certain formations and substances have been placed in the human blood by nature to fight against infection. Often, this defending army of the bloodstream wins the fight against the invading army of diphtheria germs, and when that happens, the patient gets well.

Now once recovered, such an individual rarely gets the disease again. The defending army in his bloodstream has learned how to repel the attacks of this particular germ.

Comparatively recently, doctors have discovered a substance called "Toxoid" which, when injected into a human body, induces the blood to develop that same resistance to an attack of diphtheria. In other words, the immunity to diphtheria which a patient painfully develops, it is now possible to give to a child by a simple, safe series of injections under the skin.

Your own family doctor can administer this treatment and it is up to all parents to make sure that their family doctors do so. It is safe and simple and sane and practically painless. At one time the City of New York immunized 10,000 infants with toxoid, without any ill-effects whatever.

How much simpler to have your children undergo this simple treatment than to have your house quarantined and possibly lose a child or two through diphtheria! If only every public health department would see that this marvelous substance be put at the disposal of every parent, and if only all parents would insist upon protecting their children with it, diphtheria could be wiped out of Canada within ten years, and hundreds of lives and thousands of dollars saved every year.

Likely To Be Popular

Increased Demand For Canned Whole Chicken Is Expected

In his annual report, recently published, the veterinary director general of the Dominion Department of Agriculture calls attention to the increase in the number of poultry products processed under government inspection. The packing trade are canning more meats and poultry in Canada, and there appears to be room for considerable development in the field of canned chicken. Canned whole chicken made its appearance on the market last year and from the reports received it, the new business is likely to develop into one of considerable proportions.

Canadian Cattle Welcome

A welcome for Canadian cattle at the port of Birkenhead, England, was promised by Mayor T. McClellan, when the meat trade section of the National Union of Distributive Workers, of which he is national organizer, made a presentation. They could confidently expect to receive a considerable proportion of the 15,000 cattle available for export before the end of the year, he said.

There are more than 8,000 varieties of dahlia on the market.

"That stupid Frenchman is sitting on my hat and I don't know a word of French."—Hummel, Hamburg.

How Women Lose Fat In England

How would you like to lose unhealthy fat that you don't need and don't want, and at the same time feel better than you have for years?

How would you like to lose your double chin and your too prominent abdomen, and at the same time make your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal, and at the same time develop that urge for activity that makes work a pleasure and also gain in ambition and keenness of mind?

Get on the scales to-day and see how much you weigh—then get a bottle of Kruschen Salts. Take one-half teaspoonful every morning in a glass of hot water, and when you have finished the first bottle weigh yourself again.

Now you will know the pleasant way to lose unsightly fat, and you'll also know that the six vitalizing salts of Kruschen have presented you with glorious health.

That's the way Englishwomen keep slim—why not you?

WORLD HAPPENINGS BRIEFLY TOLD

A small sheet of the first commercial zinc produced in Manitoba was sent Mayor Webb by officials of the Hudson Bay Mining and Smelter Company at Flin Flon.

Toronto's first and only woman bank bandit, 17-year-old Kathleen Boyle, of Buffalo, N.Y., sentenced last April to two years in reformatory, has been released on parole.

A stump hurled through the roof of the camp building during blasting operations killed the infant daughter of Mr. and Mrs. William Schunter, Sugar Lake, B.C.

With the immediate object of putting the Canadian fishing industry on its feet, Hon. E. N. Rhodes has arranged for an exhaustive survey of marketing catches at every stage from the fisherman to the consumer.

Canada could aid in the economic recovery of Australia by buying more Australian goods, Lord Stonehaven, former governor-general, said in an address to the Canadian Club at Victoria.

Anticouncement has been made by E. W. Beatty, president of the C.P.R., of the acquisition of a site facing Berkeley Square for the big hotel proposed to be erected by the company in London, England.

A telegram from Tientsin announced the death of Bertram Lennox Simpson, British author, who wrote under the name of Putnam Weale, from wounds inflicted by three Chinese gunmen who invaded his house and shot him in the back.

The Prince of Wales is understood to be planning to sail for South America, January 15, on the the trip which has been arranged for him to open the British Trade Exposition at Buenos Aires. He will pay visits to other parts of South America and the West Indies.

Grassy Lake Coal

Coal Obtained By Methods New To Commercial Mining In Alberta

The recent shipment of a car of high grade lump coal, billed from Grassy Lake, Alberta, to Winnipeg, is of unusual interest. Apart from its marking the revival of coal shipments—for Grassy Lake was shipping coal to Saskatchewan in 1909—this shipment has a special interest in that the coal was obtained by methods new to commercial mining practice in Southern Alberta. Future shipments will be watched with considerable interest.

Holstein Herd Has Good Record

Three Holstein cows, members of a herd owned by James A. Thomson of Moose Jaw, have just finished yearly records in the R.O.P. with a production averaging 13,667 pounds of milk containing 657.50 pounds of butter.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

The Deadly Monoxide

Four Points Motorists Should Remember About This Poison Gas

Every motorist who is tempted on cold mornings to start his car in the garage and allow the engine to warm up with the doors and windows of the building closed, should remember these four points about the deadly carbon monoxide gas:—

You can't see it!
You can't smell it!
You can't taste it!
But it is deadly!

Keep the doors and windows of your garage open when you have the motor running, or better still, don't let it warm up until you are in the driveway.

Don't run your motor in a closed garage. Statistics show that the hazard of carbon monoxide poisoning, while not very prevalent when compared with other accident dangers, is gaining rapidly. Last year there were more than twice as many deaths from this cause as in 1924. In 1928 and 1929 death rates from carbon monoxide poisoning showed a steady increase.

Many physicians claim there is no antidote for it. The first thing to do is to get the victim out into the air as quickly as possible, endeavour to bring him back to consciousness by means of artificial respiration and, possibly, use oxygen.

Winnipeg Newspaper Union

Fashions

(By Annette)

916

THE SMART SCHOOL GIRL TYPE KILTED PLAITED SKIRT UNDENIABLY CHIC DETAIL

It's so entirely girlish yet so entirely sophisticated.

The slightly moulded bodice presents a trim tailored air. The neck is particularly becoming in square effect, finished with a flat collar. Buttons down the center-front are decorative.

The skirt is given a graceful swing with wide panel effect at the front with kilted plaits at either side and back.

It's Oh! so simple to make. The outlay unbelievably small.

Style No. 916 is designed for the important age of 8, 10, 12 and 14 years.

It is shown in dark green crepy patterned woollen. The buttons are green enamel to match the enameled belt buckle.

Covert cloth in wine red is very jaunty.

Dark blue wool jersey with vivid red buttons and completed with red leather belt is very smart and practical.

Size 8 requires 2¾ yards 39-inch material.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

A SINGLE SIP PROVES IT

Some Mighty Midgets

Many Small Creatures Stronger In Comparison Than Large Ones

It has been proved that the common small can draw a load which is fifty times heavier than itself. If an elephant were as strong, in proportion to size, it would have to move nearly 270 tons.

That is only one specimen from Nature's collection of "mighty midgets" that perform in secret on land and in the sea.

Even the strongest men find it difficult to lift more than their own weight. Yet, a bluebottle fly can lift more than 30 times its own weight, while it can draw a load that is 150 times heavier than itself.

Objects which are about forty times heavier than themselves are often carried by the mason wasps.

You have seen those ear-splitting powerful drills which are used to tear up the road? Well, there is a mollusc, known as the piddock or pholas dactylas, which can rival their power, and is a superior worker, as it makes no noise.

Silently, but none the less efficiently, the piddock bores through the hardest rock as casually as if it were soap.

Recipes For This Week

(By Betty Barclay)

OATMEAL COOKIES

1½ cups special cake flour, sifted.
2 teaspoons baking powder.
½ teaspoon salt.
2 teaspoons cinnamon.
1 teaspoon cloves.
½ cup butter or other shortening.
1 cup sifted brown sugar.
1 egg, well beaten.
1¾ cups oatmeal.
½ cup milk.

Sift flour once, measure, add baking powder, salt, and spices, and sift together three times. Cream shortening, add sugar gradually, and cream well. Add egg. Add oatmeal and flour, alternately with milk, mixing well. Drop by teaspoons on greased baking sheet and bake in moderate oven (350 degrees Fahrenheit) 18 to 20 minutes. Makes 4 dozen cookies.

THANKSGIVING CONSERVE

3 cups cranberries.
1 cup diced apples.
1½ cups water.
1 cup crushed pineapple.
1 lemon, juice and grated rind.
2 oranges, juice and grated rind.
3 cups sugar.

Cook cranberries and apple in the water until tender. Add pineapple, lemon and oranges and sugar. Mix well and cook rapidly until thick and clear. Turn into sterilized glasses and when cold cover with paraffin.

Evidences Of Prosperity

Times Do Not Appear To Be So Bad In This Western City

Among a number of evidences of prosperity in Edmonton, cited by "The Journal," is the fact that the number of telephones in use has increased within a year from 16,124 to 16,641, or over 500. Another evidence is that "one wholesale house in this city sold $30,000 worth of radio sets in September"—thus showing a fair volume of luxury spending.

Award For Canadian Scientist

E. M. Kindle, chief of the division of paleontology, Dominion Department of Mines, is the recipient of an award by the United States National Research Council, it is announced at Ottawa. The award was made in recognition of Mr. Kindle's geological investigations.

Lubricants are being made from olive oil in Spain.

Chapped Skin

Wind, snow and sleet bruise unprotected skin surfaces. Minard's heals the raw skin tissue and affords full protection.

MINARD'S "KING OF PAIN" LINIMENT

May Lose Duchy Income

If Prince Succeeds To Throne Unmarried Parliament Could Take Control

The problem of the future succession to the throne is a matter of less interest to the English royal family at the moment than the question of the future ownership of the Duchy of Cornwall, the revenue from which provides the Prince of Wales with an income of more than £160,000 a year and is rapidly increasing.

It is obvious that the Prince of Wales must succeed his father if he survives him. But who will then succeed to the revenues from the Royal Duchy of Cornwall?

When King George dies the Prince of Wales will cease to be entitled to receive a penny from the duchy. The rich revenues from the duchy would then pass into the control of Parliament and an act of Parliament would have to be passed to determine how the income would be administered.

This is a contingency King George would like to avert if possible. He would prefer to have the future status of the duchy settled during his life.

In the event of the King's death and the Prince of Wales succeeding to the throne unmarried the Duke of York would become the next heir to the throne. The desire of the royal family is that the Duke should have control of the duchy after becoming heir to the throne and that any subsequent and direct heir to the throne should inherit the income.

If control of the revenues from the Duchy should pass into the hands of Parliament it is certain that Parliament would never relinquish its prerogative and future heirs to the throne would receive only a grant from the duchy, the amount being determined by Parliament.

Behind the scenes a good deal is going on in connection with the future possession of the duchy, but it seems almost certain that the control of the duchy will remain in the hands of the royal family only if the Prince of Wales should marry and have an heir before the death of his father.

British Columbia Angora Rabbits

Fifth Shipment To Japan Being Sent By Provincial Association

The fifth consignment of British Columbia bred Angora rabbits will be shipped to Japan immediately by the B.C. Provincial Rabbit Breeders' Association. Four previous shipments have so convinced the Japanese breeders of the superiority of British Columbia stock that they are buying all their rabbits from the province.

Angus: If you've found such a valuable ring the law requires that you advertise for the owner.

Sandy: Ay, mon, and which newspaper has the smallest circulation?

A folding house, which may be packed into a box and wheeled behind an automobile, is a German invention for use on week-end trips.

Do not rest on your laurels; they make a poor mattress.

SOUR STOMACH

JUST a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard anti-acid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids.

Remember—the genuine is always a liquid. It cannot be made in tablet form. Look for the name Phillips'. Its always on the wrapper for your protection. Druggists everywhere have the 50c bottles.

Canadian Tobacco Production

Total 1930 Crop Given As 36,712,700 Pounds

Enough tobacco has been grown in Canada so that if distributed among the population would provide each man, woman and child with over 3½ pounds. The total crop for 1930 is given as 36,712,700 pounds or nearly 7,000,000 pounds more than in 1929. This year's crop was grown on 41,391 acres, 32,170 of which were in Ontario, 9,000 in Quebec and 221 in British Columbia. Ontario accounted for 28,078,000 pounds of the total production, Quebec, 8,490,000 pounds and British Columbia, 144,700 pounds.

For several years several million pounds of tobacco have been exported to the British Isles, and it is expected that this year a considerable percentage of the crop will be exported.

Salt Refinery Plant

The Arden Vancouver Salt Company proposes to erect shortly a refining plant on False Creek to refine about 10,000 tons of salt yearly, bringing the raw product either from California or from the evaporation beds in the British West Indies.

Oil men have borrowed an idea from dairymen by using the cream separator to extract petroleum from tar and sand.

One of the world's really "rare metals" is columbium, for only about 25 pounds of it exist today in sheets, bars, rods, and wire.

Horses From Royal Ranch

Exhibits From Prince Of Wales Ranch Win At Portland, Ore.

Eight Clydesdale horses and one Percheron exhibited from the ranch of H.R.H. the Prince of Wales, at the recent Pacific International Livestock Show at Portland, Oregon, carried off eleven first prizes and one second. The entries also were awarded all the championships in the Clydesdale classes, the one second prize being awarded in the case where two horses from the Prince's string were shown in one class.

The entries from the Prince of Wales ranch, which is at Pekisko, Alberta, about sixty miles southwest of Calgary, were widely advertised prior to the opening of the show, and the horses were stabled in a special section decorated with the Prince's colours—scarlet and purple.

Canadian Exhibit Wins

The Canadian stand at the Ideal House Exhibition at Edinburgh, Scotland, has been awarded the gold medal for general excellency, beating out 100 other exhibitors. The stand was prepared by the Dominion Government Exhibition Commission.

Jones—Happy are they who look before they marry.

Bones—Yes, and overlook afterwards.

Glacier National Park, sometimes called the "trail park," has nearly a thousand miles of horse, foot, and fire trails.

End Pain, Swelling & Bleeding of PILES (HÆMORRHOIDS)
With Zam-Buk Herbal Ointment.
Ointment 50c. – Medicinal Soap 25c.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livest ock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER IV.—Continued.

"He wouldn't have complained in any case," Gay answered loyally. "That's Nick, Mr. Bartlett. He may not altogether like what life gives him, but he makes the best of it. By all the rules of the game he should be wading in the Pacific, or on the way there; but he has chosen to stick by me. I'm going in now to wash up. Train travel is an abomination. While I'm gone Nick can tell you our problems, and then I'll tell all the things he's forgotten!"

She arose, her hand tightening a bit on her husband's shoulder, and with a smile for the old man she went within. Nick sat quite still for a moment, looking down at the maples in the valley: a gorgeous panorama in gold and crimson.

"No," he said thoughtfully, harking back to the old man's question, "I've never set foot out of New England; yet I thought when Gay and I started off together——" He smiled, as if visioning something very far away. Then the smile vanished, and he said soberly: "Mr. Bartlett, the biggest thing in life has come to us."

He looked up, meeting the old man's untroubled gaze.

"I—ain't surprised," said Simeon Bartlett quietly. "Somehow I knew, soon as I asked what brought you home. Nothin' else would ha' held either of you back from conquerin' the world. You—you ain't by any chance lettin' yourself feel disappointed, boy?"

"I can't you know, for Gay's sake," Nick answered quickly, "though I'll admit that for just a minute I was—well—stunned. All in a breath the plans of my whole life had to be changed about—changed quickly, so Gay wouldn't know I minded ever so little. Perhaps you can't understand, sir, but ever since I was a little shaver I've dreamed of doing what we set out to do. More than anything in the world I desired my freedom. Freedom! What is freedom, Mr. Bartlett, when the look in a girl's eyes has a greater hold on one than the broad highway?"

The old man rocked gently for a moment.

"Freedom," he said at last, "is just another name for happiness. Some finds it some ways, Nick, and some another. They'll likely come times, boy, when the highway'll call so hard it'll be like drawin' teeth to keep from runnin'; but the freedom a man finds in his wife's eyes ain't a bad sort to hold onto. You just hold onto it!"

"So far," Nick answered, with a queer little gesture of surrender, "it has held onto me!"

CHAPTER V.

In any New England state one can find Bakersville: a good-sized inland town where neighboring farmers come to trade on Saturdays, when Main Street is lined with teams and trucks. Its Common is bordered by ancient elm trees, amid whose boughs white churches lift their spires. There are rows of fine old pillared mansions—which seem to look down scornfully on the occasional dwelling of less stately architecture—quiet side streets, and winding byways.

The town lies in a valley, through which the river takes its course quietly and decorously, as a river should. In spring-time, when it floods the meadows, it stops considerately at the roadsides, making as little trouble as possible to passersby. Hills surround Bakersville on every side, sheltering it from cold winds in winter, but turning it into an inferno during July and August, so that the place has not been overrun by summer people." Sometimes an artist braves the heat in order to paint the loveliness of the surrounding country. Occasional boarders come to farms on the hillside outside the town; but as a rule the inhabitants of Bakersville have been born and bred there.

On a May morning, four years after that day when Simeon Bartlett gave his wise definition of the word "freedom," Nicholas Hastings stood in the doorway of the First National Bank of Bakersville, and drew a deep breath, preliminary to going in to the day's work. Spring was in the air and the tree-tops, painting the budding maples red—turning the orchards into bowers of beauty—tugging at Nick's heartstrings with the old, familiar urge.

Even Main Street, the least lovely part of Bakersville, looked alluring. Store doors stood open, welcoming the warm air that was to make short work of the accumulated stuffiness of winter months. At his fruit stand opposite, G. Leveroni was building a mound of oranges and pineapple, their golden beauty seeming a part of the bright sunshine; and at the post office across the way the R.F.D. man was starting out upon his rounds.

"Gosh! I envy him!" said Nick, and did not know that he spoke aloud till someone answered.

"I do myself, Nick. A great day to be out. I've half a mind to desert the ship and take a holiday."

Nick turned with a smile to the bank's president, who had spoken.

"A holiday! I've almost forgotten what the word means. Take one by all means, Mr. Maxwell. I guess we can worry along without you!"

John Maxwell laughed.

"I'd jump at that advice if my car wasn't in the paint shop. As it is——"

He stopped, suddenly aware that Nick's attention had wandered. A blue roadster was standing before the post office, from which stepped a slender woman in a crisp gown that matched the car. There was something lithe and graceful in her figure that caught John Maxwell's eye. Pausing on the top step, she turned, and perceiving Nick, waved a greeting to which he responded with a gay gesture and a quick lighting of his eyes, which, though lost on the lady across the street, was quite visible to the keen gaze of the bank president.

"Your new neighbor?" he queried, as she turned about.

Nick started, as if his thoughts were far away.

"Yes. Nice people—the Hallidays. she's an artist, you know. Her husband writes."

"Any children?"

"No. I believe they have some sort of notion that children would hamper their careers."

John Maxwell snorted with indignation.

"That's all I care to hear about 'em. How's Gay?"

Nick faced his questioner.

"Gay? What made you ask, sir?"

"Thought last time I saw her she looked seedy. Didn't like it, I'm very fond of Gay."

Nick smiled.

"I'm fond of her myself!" Then he said soberly: "The kids both indulged in whooping cough, you know, and Gay lost sleep. She's not been quite right since—tired, I guess. Well" (with a reluctant glance at the town clock), "I suppose I must retire to my cage."

"A cage—for Nick!" murmured John Maxwell as the boy left him. He stood for a moment watching the lady in the blue roadster ride away. He frowned. Then his thoughts flew to Gay, and his face softened. "She's in a cage, too," he thought wisely, "only she doesn't guess it, bless her loyal heart! Well, I trust their new neighbor will keep her hands off Nick —and her eyes, too! She hasn't any babies to lose sleep over. No wonder she looks fresh as a new-blown rose."

Then, as reluctantly as Nick, he, too, entered the portals of the First National Bank. But business was not pressing that morning, and his thoughts wandered. Why, he thought irritably, hadn't the janitor extinguished the furnace fire? The pipes of the radiator were still warm. He arose, opened another window, and in desperation threw wide the door to his private room. At eleven o'clock he decided he couldn't stand it. Passing Nick's cage he said; "I'm taking your advice—till after dinner. Thunder! this place is stifling! Why don't you open something more?"

Nick made a discouraged gesture toward a stenographer.

"She's got a cold. She always has a cold—can't stand a draught, so the rest of us suffer. A draught, on a day like this! If you'll kindly forget to close the door when you go out I'll award you a medal for saving one life at least."

"It would be the first I ever received," laughed John Maxwell as he obeyed.

He stepped outside, drawing in a long breath of the welcome air. His own home lay to the north, but something drew him in the opposite direction—possibly the sight of a blue roadster turning a corner. He followed it, and came out on the house once occupied by Selina Smith. There he paused, surveying the old-time garden that had been restored. A rickety cow shed had vanished, and in its place stood a trim garage, connected with the house by a pergola, which would soon be a wealth of climbing roses.

It was a good old house, thought John Maxwell. He was glad the new people hadn't spoiled it with a tower, as the man who bought the Blodgett farm had done. Give it a year or two, and the garden would be a thing of beauty. And it was good to see a coat of new white paint, even though it made Nick's house next door look shabby. Yes, it did look shabby; there was no denying the fact: but painting cost in these days, and the boy's expenses had been heavy the last three years.

(To Be Continued.)

Some say the answer to "How can I live without her?" is "much cheaper."

YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl chum told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby boy."—Mrs. J. B. STALKER, Bancroft, Ontario.

If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's CASTORIA

W. N. U. 1904

Wonderful Diving Outfit

German Device Enables Man To Work At Great Depth

The salvaging of the German navy from the bottom of Scapa Flow was perhaps the biggest job of the kind on record. A wonderful feat it was, made comparatively easy, however, by the fact that the fleet lay in shallow water.

Hitherto, no great feat of salvage has been accomplished at a greater depth than 300 feet, and very few at that depth. But a German firm has constructed—that is the right word—a diving outfit that enables men to work at 400 feet or more. The Lusitania is in 500 feet of water off the coast of Ireland, and it is expected the divers will be able to get at her if they want to.

The German outfit can scarcely be called a diving suit. It is a steel house, from inside of which its single tenant is able to work. The headpiece is as big as the conning tower of a submarine. With its 5,000 candlepower searchlight, like a Cyclopean eye, in front to penetrate the Stygian darkness of the sea hundreds of feet below the surface. It looks like a fabled monster. The working tools are manipulated from the inside of the outfit, and the divers have special devices to overcome pressure.

There are thousands of ships down in Davy Jones' locker, containing, in the aggregate, money, gold and silver bars, jewels and other imperishable treasure of untold value. Most of it is probably irretrievably lost, but science is going to wrest a lot of spoil from the Old Man of the Sea in the not very far distant future.

A Simple Treatment For Children's Colds

Cold in the head is very common at this time of year, especially in the very young. Neglect of a cold is prone to lead to serious consequences. To relieve all congestion of the system is the first step in treating a cold, whether in infants or adults. For the very young, Baby's Own Tablets are the ideal means of doing this. Containing no narcotic or other harmful drugs they soothe the child's fretfulness, relieve its suffering and ensure convalescence.

Baby's Own Tablets are without an equal for relieving indigestion, constipation and colic. They check diarrhoea, break up colds and simple fevers; promote health-giving sleep and make teething comparatively easy. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Provincial Air Service

May Be Inaugurated Soon In the Western Provinces For Forest Protection

Inauguration of a provincial air service in the prairie provinces for forest protection may follow as a result of the transfer of natural resources, it is learned.

This phase of forest protection will be discussed between Rt. Hon. R. B. Bennett and the premiers of the three prairie proinves on the return of the federal minister from London, England, it was stated by Premier Anderson at Regina. In lieu of instituting a provincial service in each province, an arrangement may be reached between the provincial and federal governments for the use of the Royal Canadian air force machines in forestry service.

Discussion of this matter came before the natural resources conference held at recently at Edmonton.

New Canadian Destroyer

The second of Canada's two new destroyers, the "Skeena," was successfully launched at Southampton recently, Miss Mildred Bennett, sister of the Canadian Prime Minister, performing the christening ceremony before a distinguished gathering. The destroyer slid gracefully into her element bearing a large maple leaf across her bows.

"Buy a ticket for your concert? But I don't know you." "Yes, you do, sir. I'm the man who turns your water off when you don't pay the rates."

Every 40 seconds someone is either injured or killed by present day modes of transportation, experts claim.

Use Minard's Liniment for Toothache.

Idea Proved Effective

Dresden Painter Tried New Way To Collect Money

A new and effective method by which an artist may exert gentle pressure upon an unwilling subject of a portrait has been successfully tried at Dresden. A young, unknown painter, having nearly finished a commissioned likeness of one of Dresden's leading industrialists, was told that the agreed upon sum of $500 would not be paid. The industrialist declared that the portrait bore not the slightest resemblance to him. The artist respectfully asked if he might have this statement in writing, as he had borrowed money on the expectation of being paid and wished to be able to show his creditor why he could not meet his obligation. To this the industrialist agreed.

Shortly thereafter at an exhibition a painting appeared entitled "Portrait of a Well-Known Swindler." Dresden, recognizing the likeness, laughed. The industrialist visited the exhibition, flew into a great rage and demanded the immediate removal of the picture. The artist blandly produced the signed statement asserting that the portrait bore no resemblance whatever to the sitter. The upshot was that the industrialist decided to buy it for $1,000.—New York Times.

League Of Nations

Sir George Foster Sees Lack Of Interest Shown In Work At Present Time

Apathy towards the League of Nations is at the present time very apparent in Canada, in the opinion of Sir George Foster. At a meeting here of the central executive of the League of Nations Society of Canada, Sir George declared he had gained this impression in travelling over the Dominion last summer.

The Dominion government was apparently going to be up against a big problem in preparing its budget next year owing to prevailing conditions, Sir George told the executive, and he added the opinion that the society could hardly look for any increase on the grant the government makes for the carrying on of the society's work.

An intensive speaking campaign was one suggestion made as a means of reviving interest in the league and enlisting financial support. Sir George volunteered his services for a number of meetings if decision is reached to appeal to the public in this manner.

Interested In Grain Show

Directors of the Co-Operative Wholesale Society of Great Britain, who recently concluded a tour of Canada, have expressed themselves as greatly interested in the World's Grain Show to be held at Regina in 1932, and have indicated that in all probability they will visit the Exhibition and Conference at that time.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

New German Money

The Germans, this fall, are going to be presented with a new kind of paper money that has some remarkable claims made for it. It is a new type of paper currency guaranteed not to burn, tear or crumple.

"Ice Box Cookies"

1 cup butter; 2 cups sugar; 3½ cups Purity Flour; 2 eggs; 2 teaspoons baking powder; flavoring; 1 cup nuts and raisins chopped (optional)

Make the dough in a cold cool place, and keep in the ice box or a cool place. Slice chilled and bake in a quick oven.

Little Helps For This Week

"Into Thine hand I commit my spirit."—Psalm xxxi. 5.

Father, Thy hand the wild bird brings
With fearless flight, from shore to shore.

Safe in that sheltering peace it sings,
How'er the tempest roar.

So tossed, so frail, so lone am I,
Except that hand my guidance be,
Hear Thou my fearful, hopeful cry,
Dear Lord, lay hold of me.

—Rose Terry Cooke.

Cling fast to the hand that is leading you, though it be in darkness, though it be in deep waters, you know whom you have believed. Yield not for a single moment to misgivings about future storms. Infinite love, joined to infinite skill, shall pilot the way through every strait and temptation.—J. Alexander.

Persian Balm is a true elixir of youth. Refreshes and rejuvenates. Adds a youthful charm to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. Soothes dry and irritated skin. Corrects and preserves. A flawless toilet requisite for every discerning woman. A true aid to beauty.

American Author Wins Nobel Prize

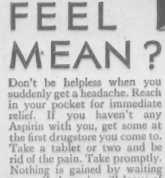
Sinclaar Lewis Chosen For Honor This Year

Sinclair Lewis, noted United States author, has been voted the Nobel prize in literature, for 1930.

Sinclair Lewis' name among United States authors prominently mentioned for the 1930 Nobel prize in literature which this year sets a new record of $46,350. Theodore Driser also was prominently mentioned. Among the best known books of Mr. Lewis are "Main Street," published in 1920 which brought him into international notice; "Babbitt" in 1922, "Arrowsmith" in 1925, and "Elmer Gantry" in 1927.

Banish pain with Minard's Liniment.

It was a wise man who said: "Smartness enables a man to catch on, but wisdom tells him when to let go."



FEEL MEAN?

Don't be helpless when you suddenly get a headache. Reach in your pocket for immediate relief. If you haven't any Aspirin with you, get some at the first drugstore you come to. Take a tablet or two and be rid of the pain. Take promptly. Nothing is gained by waiting to see if the pain will leave of its own accord. It may grow worse! Why postpone relief? There are many times when Aspirin tablets will "save the day." They will always ease a throbbing head. Quiet a grumbling tooth. Relieve nagging pains of neuralgia or neuritis. Or check a sudden cold. Even rheumatism has lost its terrors for those who have learned to depend on these tablets.

Gargle with Aspirin tablets at the first suspicion of sore throat, and reduce the infection. Look for Aspirin on the box—and the word Genuine in red. Genuine Aspirin tablets do not depress the heart.
